

READY FOR NEW CONNECTIONS

OUR INNOVATIONS

WHO IS NORTHCOMP?

Are you a discerning and leading manufacturer of furniture, appliances and equipment for all types of living and working environments? Then you've come to the right place. Northcomp is your one-stop partner for high-quality component solutions. With full commitment and conviction, we take responsibility for every project and think one step ahead for you.

Together we design not only products, but also functional building blocks for modern living and working spaces – consistently tailored to your requirements and the wishes

of your customers. We are 100% committed to you throughout the entire process, from development to production and delivery.

We are curious and courageous pioneers with ideas and expertise to take your project to the next level. Let's create innovative, inspiring solutions that make people happier and their daily lives easier – thoughtful, functional and aesthetic.

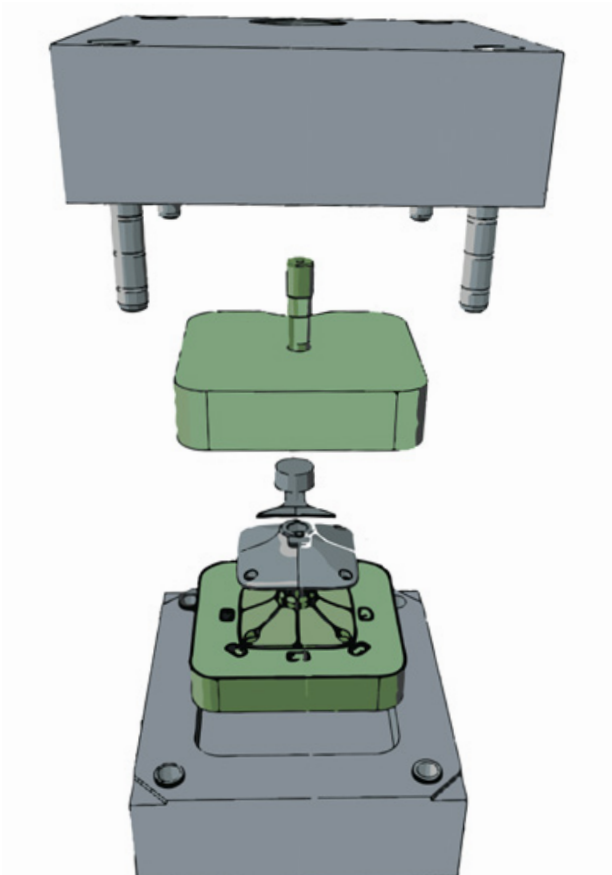

Exploring for people.

COMPONENTS

Discover our diverse selection of standard components to support your projects. We offer proven solutions to help you achieve your goals efficiently and successfully.

ENGINEERING

Together with you, we develop customized solutions for your individual requirements. Our experienced team is always at your side to realize your ideas.

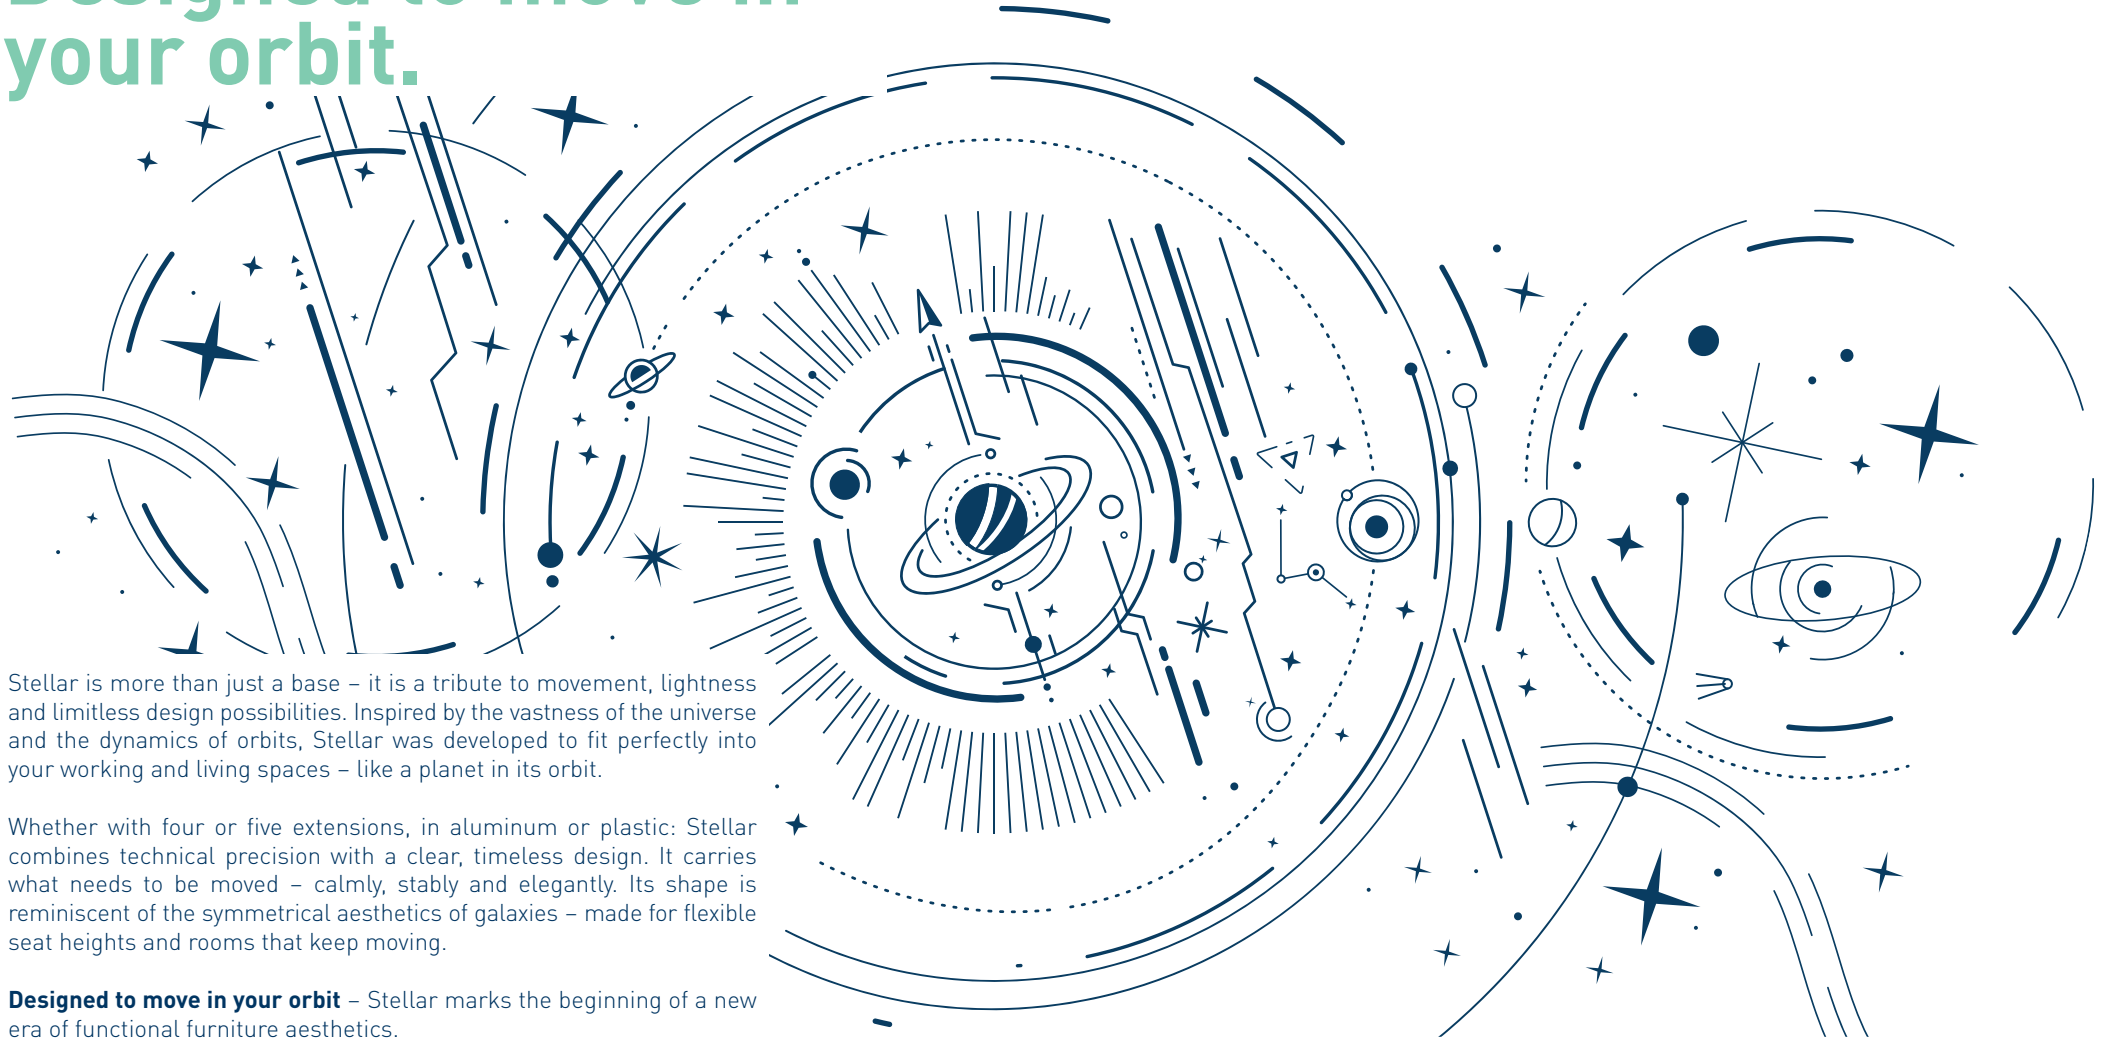

MANUFACTURING

Our broad network of long-standing suppliers and service providers enables us to draw on a wide range of production depth in order to fulfill every requirement.

Stellar.

Designed to move in your orbit.

Stellar is more than just a base – it is a tribute to movement, lightness and limitless design possibilities. Inspired by the vastness of the universe and the dynamics of orbits, Stellar was developed to fit perfectly into your working and living spaces – like a planet in its orbit.

Whether with four or five extensions, in aluminum or plastic: Stellar combines technical precision with a clear, timeless design. It carries what needs to be moved – calmly, stably and elegantly. Its shape is reminiscent of the symmetrical aesthetics of galaxies – made for flexible seat heights and rooms that keep moving.

Designed to move in your orbit – Stellar marks the beginning of a new era of functional furniture aesthetics.

OUR NEW FOOT CROSSES-SERIES STELLAR

FROM THE IDEA TO THE COMPONENT - A CUSTOMIZED SOLUTION

Stellar is our new base series – developed for variable seat heights and maximum flexibility. Designed and developed by and with Sascha Sartory, a furniture designer from Cologne, whose expertise gives the Stellar range its special character. Available in aluminum or plastic, with four or five legs, Stellar blends harmoniously into a wide variety of room concepts and impresses with its stability, functionality and design.

As a non-stop partner, we offer everything from a single source: advice, development, production and shipping. With technical expertise and a flexible production network, we ensure efficient processes and reliable results.

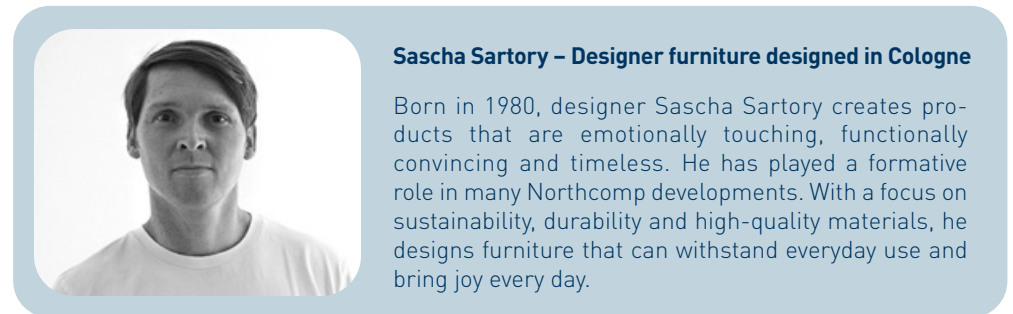

Stellar - a sophisticated solution for modern furniture applications.

COMPONENT DEVELOPMENT FROM A ONE-STOP PARTNER

ELABORATION & FINISHING TO THE PERFECT END RESULT

Sascha Sartory – Designer furniture designed in Cologne

Born in 1980, designer Sascha Sartory creates products that are emotionally touching, functionally convincing and timeless. He has played a formative role in many Northcomp developments. With a focus on sustainability, durability and high-quality materials, he designs furniture that can withstand everyday use and bring joy every day.

STELLAR 4

Scan for more information.

Where your design begins.

With the Stellar series, we offer a sophisticated range of star bases that combines elegant design with functional diversity. Whether Stellar Low, Middle or High – each variant brings the clear design language and high-quality workmanship of the series to the point and is also tailored to its respective area of application.

Stellar Low impresses with its compact design and four legs – ideal for office, visitor or conference chairs.

Stellar Middle offers increased flexibility for variable seat heights and is perfect for environments where adaptability is required. Stellar High raises the design level to table height and is the stylish base for dining and conference tables.

With clean lines, sturdy construction and versatility, the Stellar range is the ideal solution for modern living and working environments.

STELLAR 700 LOW

Aluminium base

Outer diameter:	700 mm
Height:	70 mm

STELLAR 700 MIDDLE

Aluminium base

Outer diameter:	700 mm
Height:	220 mm

STELLAR 690 HIGH

Aluminium base

Outer diameter:	690 mm
Height:	320 mm

The base is ours. The story is yours.

Northcomp components – the first step toward your furniture.

SUITABLE IN EVERY SETTING

With its clear lines and finely tuned design, the four-legged Stellar base blends effortlessly into any setting – from modern offices and stylish dining areas to cozy living rooms. It supports furniture with ease and character, without pushing itself to the fore.

Its balanced appearance creates calm and order in the room and allows other materials and colors to gently come into their own. Whether as a base for elegant chairs or expressive designer pieces, Stellar 4 adds a touch of timeless sophistication to any interior.

The beginnig of something yours.

Northcomp components – stability that moves with your ideas.

STELLAR 5

STELLAR 700 LOW

Aluminium base

Outer diameter:	700 mm
Height:	70 mm

Stability meets Style.

The Stellar 5 base stands for maximum stability combined with an elegant design language. It combines technical precision with a design that blends harmoniously into a wide variety of environments – whether in the office, home office or prestigious reception area. The balanced proportions, combined with the clear geometry of the range, make Stellar with five legs the ideal basis for high-quality swivel chairs that demand comfort, safety and style.

STELLAR 690 MIDDLE

Aluminium base

Outer diameter:	690 mm
Height:	194 mm

Application example Stellar 5

Whether Stellar Low or Middle, this balanced proportion fits perfectly to:

- Chair castor "155 SL"
- Foot cross „Stellar Middle 5 P“
- Gas pressure column "S 181"
- Dynamic Seating "Tendo Flex"

ONE BASE FOR EVERY ROOM

Whether in the office, in the home office or in modern living spaces – the clear design and balanced design language make this base a versatile solution for a wide variety of environments. It blends in discreetly and gives every chair a high-quality, stable base.

A platform for your creativity.

Northcomp components – strong foundations for bright minds.

STELLAR KU

Scan for more information.

Stellar KU combines the iconic design of the aluminium version with a decisive advantage: it is made from high-quality, recycled plastic. Light in weight, strong in effect – and at the same time sustainable and BIFMA-compliant. Ideal for modern office chairs and perfect for anyone who values aesthetics, functionality and a conscious, responsible material concept.

STELLAR 610 KU

Plastic base

Outer diameter:	610 mm
Height:	70 mm

STELLAR 708 KU

Plastic base

Outer diameter:	708 mm
Height:	70 mm

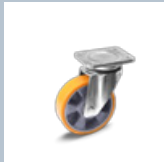

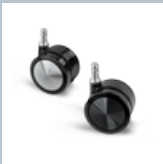

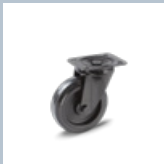

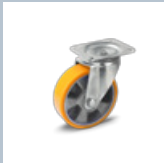

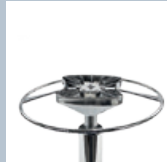

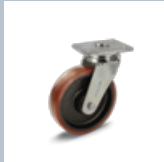

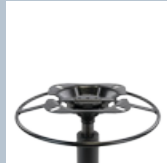

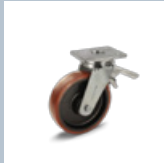

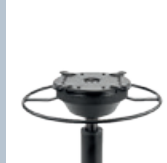

Application example Stellar KU

This combination goes perfectly with this stylish lightweight:

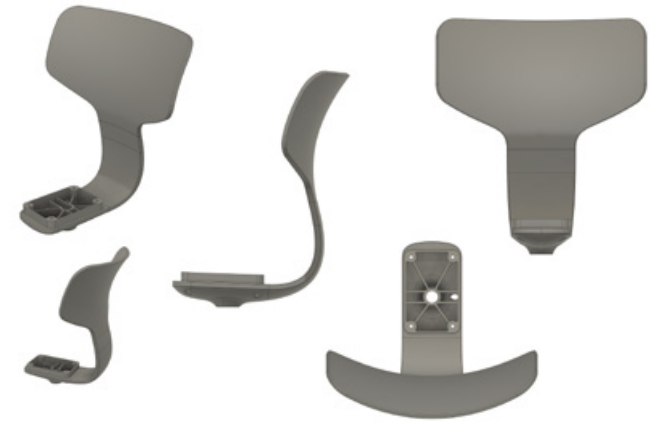

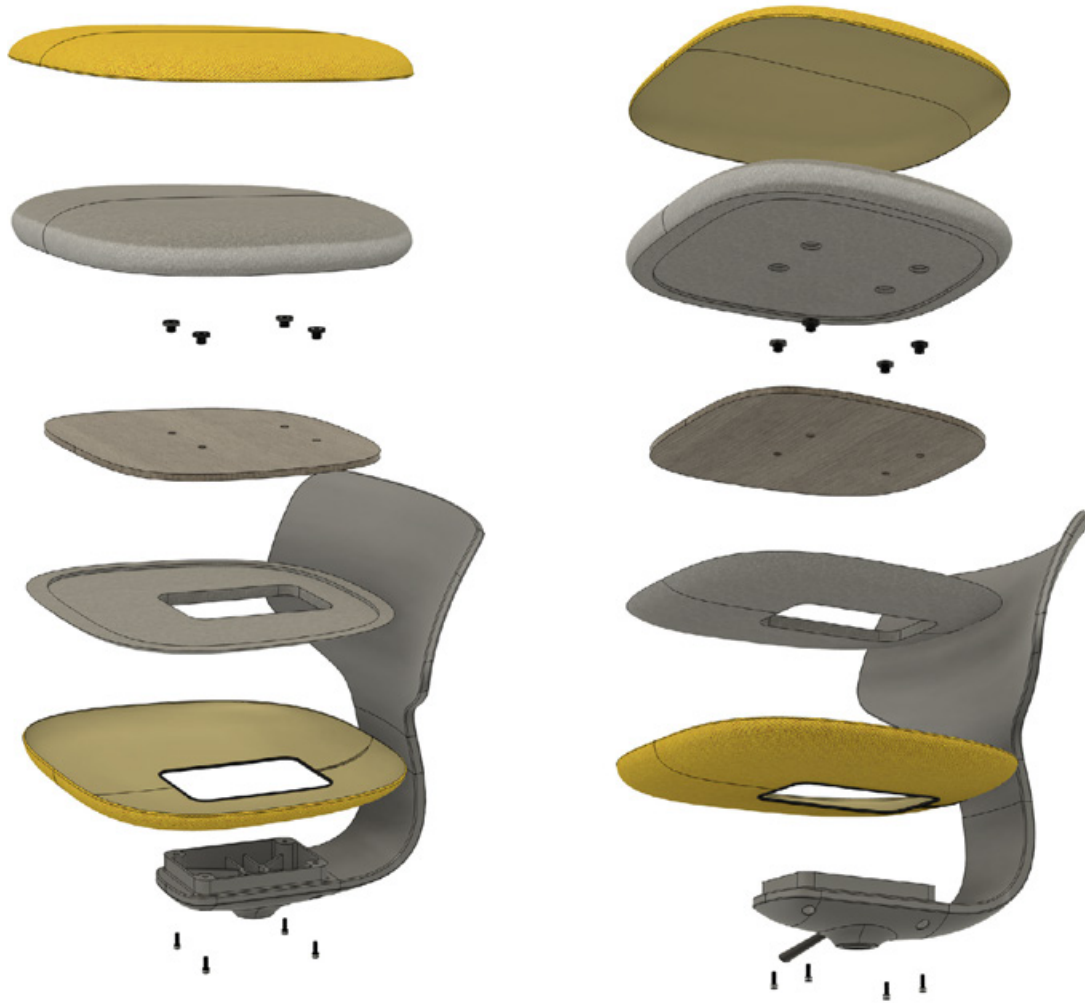

- Chair castor "155 SL"
- Foot cross „Stellar Low 5S"
- Gas pressure column "S 235"
- Dynamic Seating "Tendo Flex"

ALL PARTS OF NOAC ARE COMPLETELY RECYCABLE

Detailed View

Various views of the back supports

Side View

Backrest with mounted seat

NOAC.

The first shell engineered by Northcomp.

"NOAC" combines clean lines with an inspiring design language and elegantly redefines minimalist design. The backrest, whose shape is reminiscent of the gently curved fin of a whale, not only gives the chair an organic appearance, but also a special aesthetic lightness.

The integrated conical support contributes to a reduced, almost floating appearance and deliberately dispenses with superfluous connecting elements. This keeps the focus on the clear, flowing silhouette of the chair.

An all-round upholstered seat with a high fabric content creates a homely atmosphere and invites you to linger. The soft upholstery offers a comfortable sitting experience, while the open design allows freedom of movement and supports dynamic sitting. In this way, "NOAC" adapts flexibly to the requirements of modern living and working spaces.

With its overall light and dynamic design, "NOAC" embodies a contemporary piece of seating furniture that harmoniously combines comfort, functionality and design.

TENDO & TENDO FLEX

Convinces with first-class design.

The Tendo aluminum mechanism is a Northcomp in-house development and impresses with its first-class design – perfectly coordinated with the Stellar series. The column support fits elegantly into the cone of the base and provides a harmonious finish. Can also be combined with other star bases – for high-quality seating solutions with style and function.

TENDO

Aluminium mechanism

Height:	50 mm
Hole size min:	130x130 mm

TENDO FLEX

Aluminium mechanism

Height:	50 mm
Hole size min:	130x130 mm
Tilt:	8°

TENDO FLEX

The Tendo Flex mechanism from the Dynamic Seating range supports ergonomic sitting and promotes a healthy posture. It adapts to body weight and enables a dynamic tilt of up to 8 degrees - for more movement and comfort in everyday working life.

Tilts up to 8° in all directions

CHAIR CASTOR 155SL

The castor for demanding applications.

The 155SL is a high-quality double castor made of robust polyamide – ideal for office chairs and other seating furniture. Thanks to the load-dependent brake, the chair remains securely in place as soon as it is not under load. Functionally sophisticated, durable and versatile: the 155SL is the perfect solution for demanding projects where quality is important.
